

THE SECURITY FORMULA...

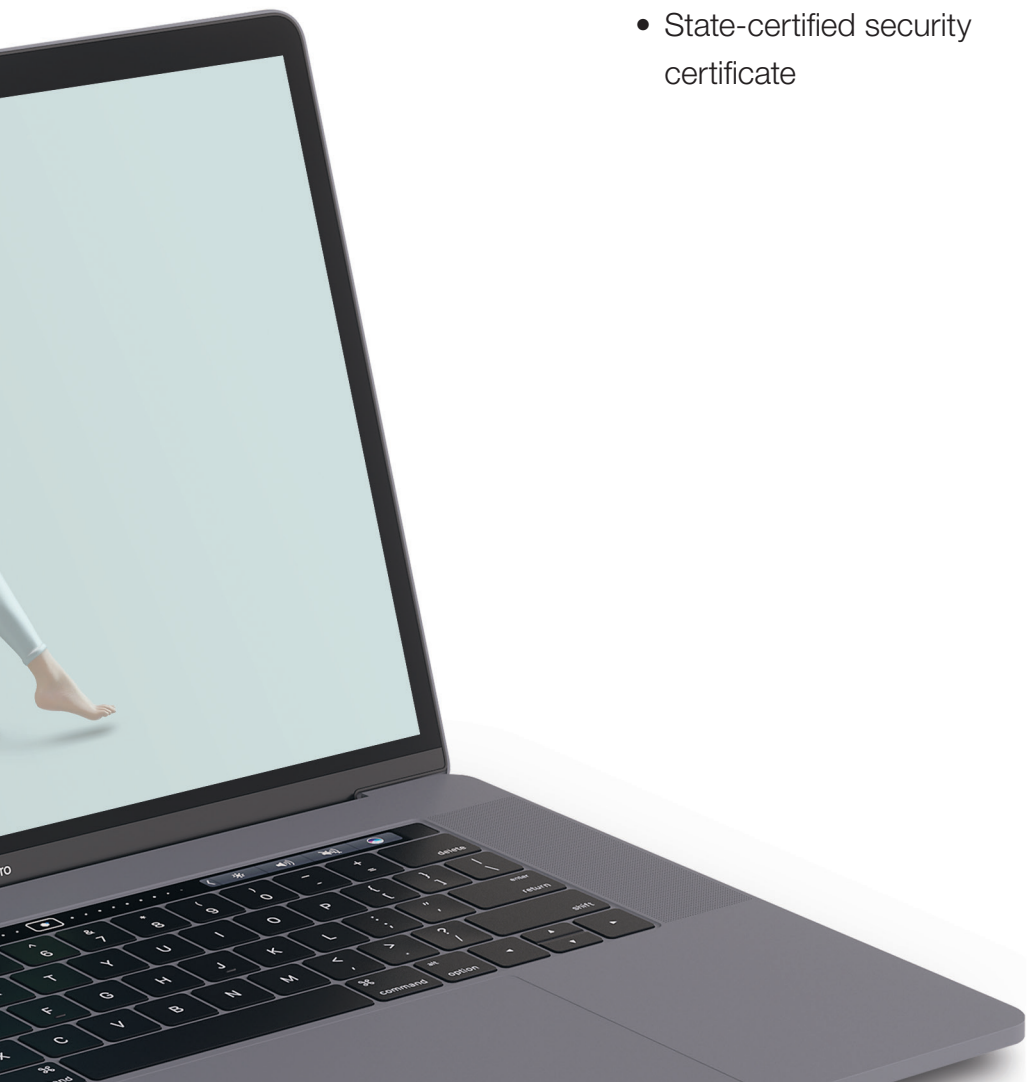

...for **certified cyber security**

Identify threats to your business early, enabling you to implement the right protective measures.

CYBERBELT® guarantees you cybersecurity and data protection with a state-approved test report based on current laws, standards and guidelines.

Your direct advantages

- Increased protection of sensitive company data from unauthorised access due to our testing activities
- Evaluation of vulnerabilities into high, medium and low risks
- Information on establishing a defence strategy
- Reduction of liability risk in the event of damage by attackers
- Objectivity and professional expertise
- Technical test report for the annual audit
- State-certified security certificate

SYSTEM SECURITY AND DATA PROTECTION

test . monitor . certify . guarantee

How can you avoid the data theft of secret data such as patient information, bank data or customer data, balance sheets, passwords and electronic documents for your company without even being liable for it?

SUBSCRIPTION

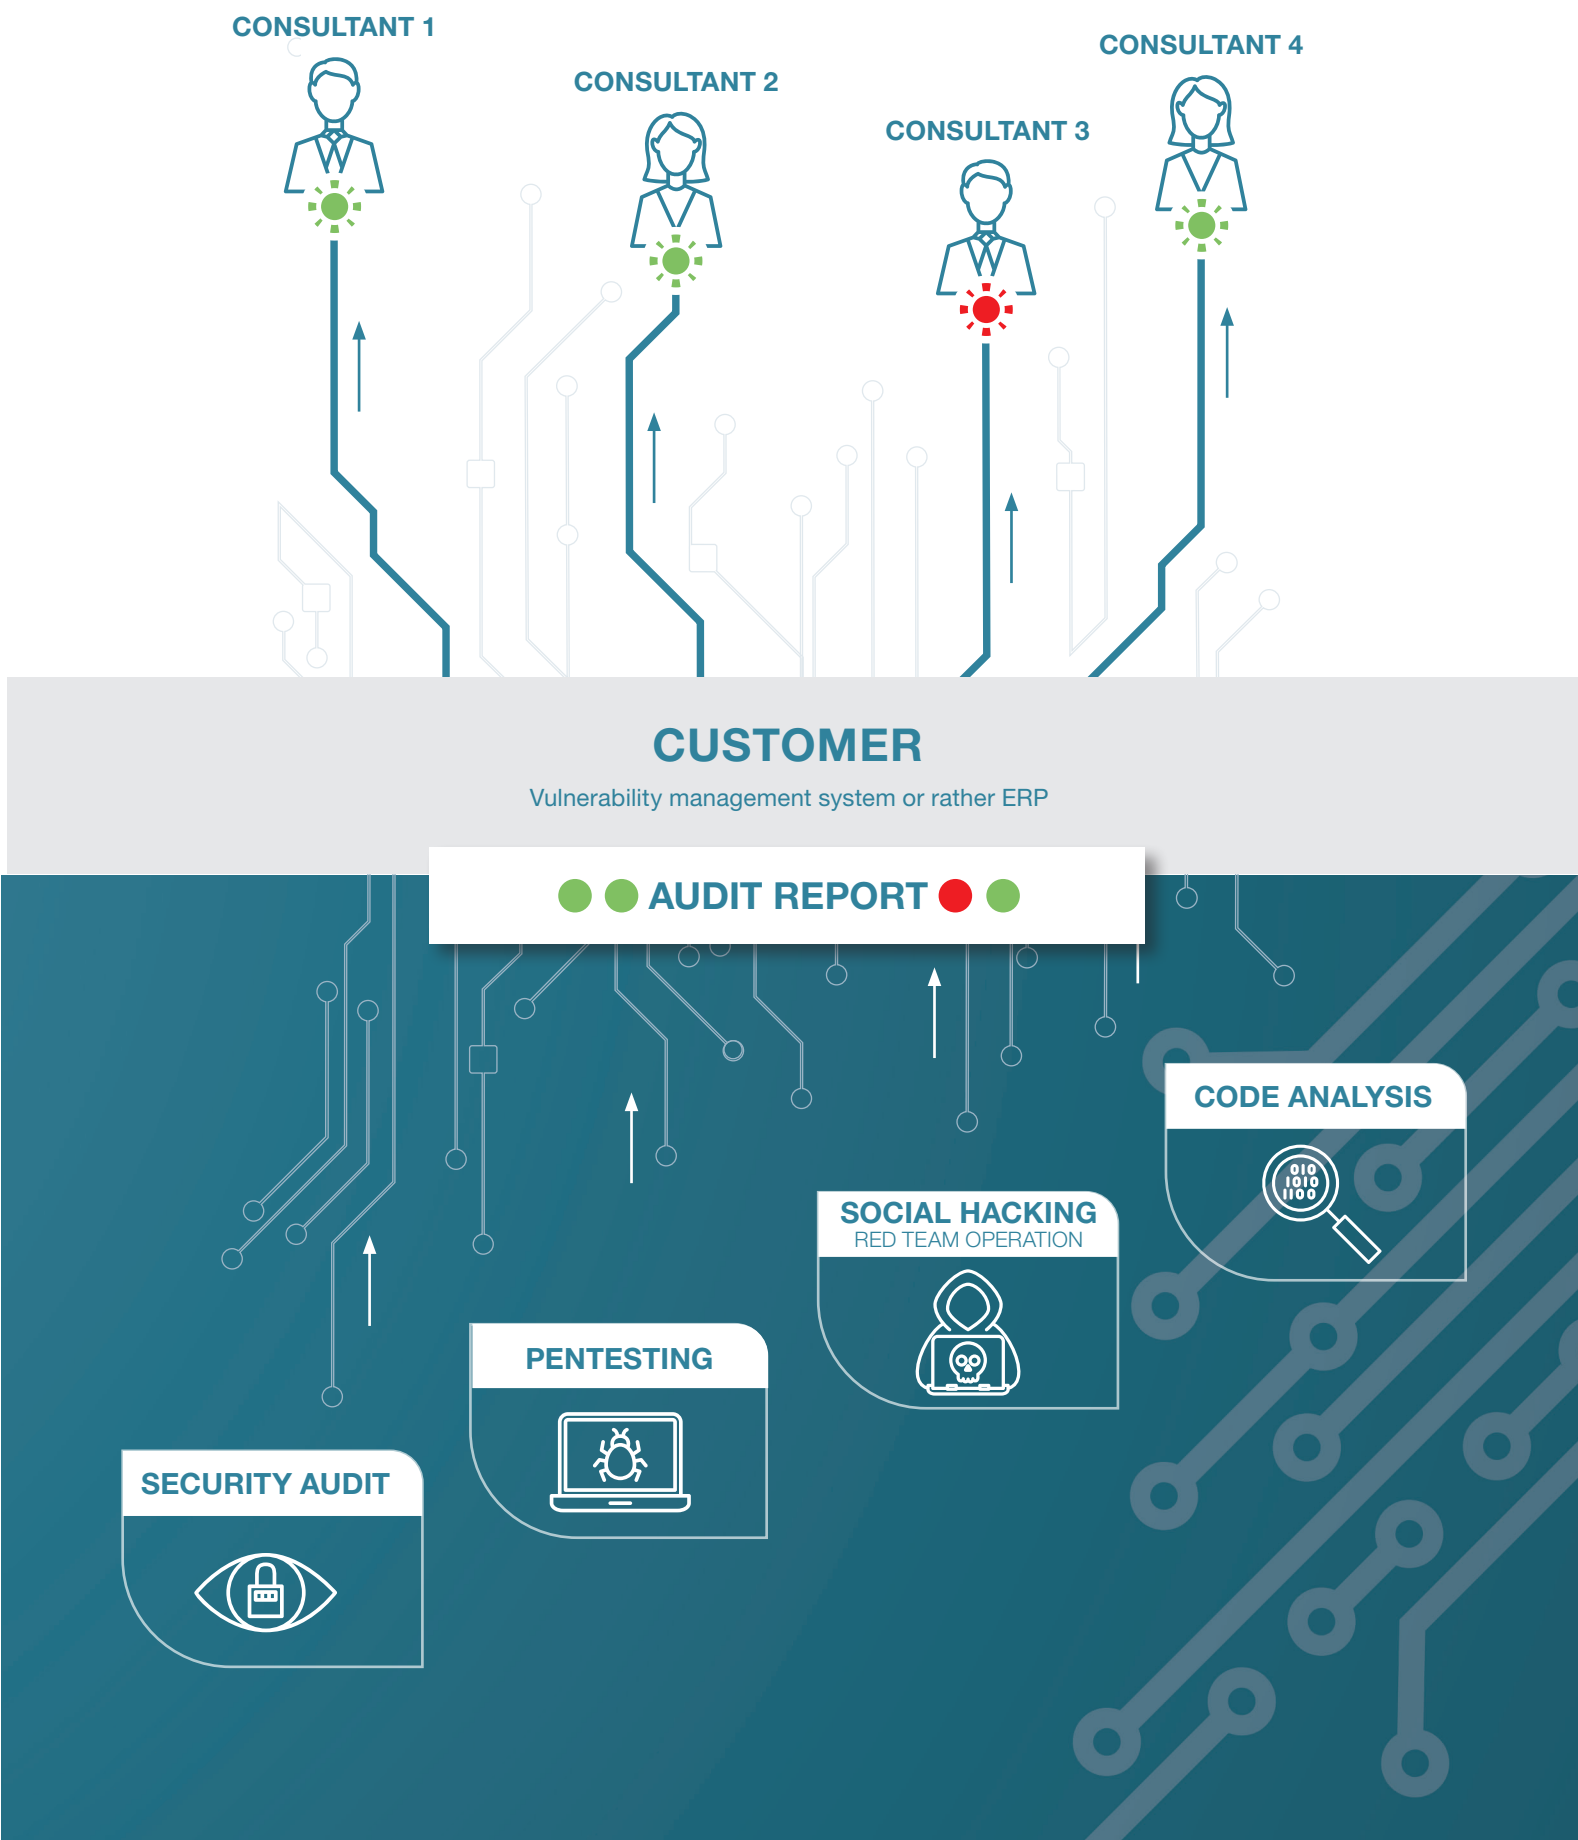

Continuous external monitoring and regular on-site auditing of IT systems on either a one-time, 12-month or 24-month basis provides increased protection against unauthorised access as well as valuable information for establishing a strategy for defence.

“The combination package of technical testing, cybersecurity certification and assumption of liability provides legislative relief for IT managers – you effectively outsource the risk of cyberattacks to us. We call this unique combination CYBERBELT© – your internet security belt.”
